RISHIKESH BARI

Data Analyst | SQL | Python | Tableau | Excel | Business Analytics
Pune, Maharashtra, India | +91-7440308589 | rishikbari01@gmail.com

SUMMARY

Data Analyst with 3+ years of experience in data analysis, SQL, database management, production data analysis, business reporting, and requirements analysis, including professional Data Analytics experience at Accenture since December 2025. Strong hands-on expertise in SQL, Python, Excel, Tableau, Pandas, NumPy, data cleaning, EDA, data validation, data visualization, KPI reporting, and root-cause analysis. Experienced in analyzing large datasets, developing and optimizing SQL queries, identifying trends and patterns, building interactive dashboards, validating data quality, and translating business requirements into data-driven solutions. Skilled in customer analytics, operational analytics, statistical analysis, RFM segmentation, and business performance reporting.

SKILLS

Programming & Data Analysis: Python, Pandas, NumPy, Matplotlib, Seaborn, Java

SQL & Databases: SQL, Oracle SQL, MySQL, Joins, Aggregations, Subqueries, CTEs, Filtering, Query Optimization, Relational Databases

Data Analytics: Data Cleaning, Data Transformation, Data Validation, EDA, Statistical Analysis, Root-Cause Analysis, Trend Analysis, Customer Analytics, RFM Segmentation

Visualization & BI: Tableau, Tableau Dashboards, Calculated Fields, LOD Expressions, Data Visualization, Excel, Pivot Tables

Tools & Technologies: Git, GitHub, Tableau Public, Spring Boot

Core Competencies: Data Analysis & Exploratory Data Analysis, SQL Query Development & Optimization, Data Cleaning & Validation, Business & Operational Analytics, Customer & Transaction Analytics, KPI & Performance Reporting, Tableau Dashboard Development, Root-Cause & Trend Analysis, Statistical Analysis & Hypothesis Testing, RFM Customer Segmentation, Database Management & Data Integrity, Business Requirements Analysis, Stakeholder Collaboration

EXPERIENCE

Data Analyst, Data Analytics — Accenture

Pune, India | **December 2025 - Present**

- Analyze business and operational datasets using SQL, Python, Excel, and Tableau to identify trends, KPIs, performance gaps, and actionable insights.
- Develop and optimize SQL queries for data extraction, transformation, validation, analysis, and reporting from relational databases.
- Perform data cleaning, preprocessing, validation, and exploratory data analysis using Python, Pandas, and NumPy to improve data quality and analytical accuracy.
- Build interactive Tableau dashboards and analytical reports to monitor business performance, trends, KPIs, and operational metrics.
- Conduct trend analysis and root-cause analysis to identify data-driven explanations for business and operational issues.
- Collaborate with business stakeholders and cross-functional teams to understand requirements and translate them into analytical solutions and reporting outputs.
- Validate datasets and reporting results by performing data-quality checks, reconciliation, and consistency analysis.
- Prepare business reports and analytical insights to support stakeholder decision-making and performance monitoring.

Software Developer (Analyst) — Ebix Technologies Pvt. Ltd. (EbixCash)

Pune, India | **December 2022 - November 2025**

- Developed and optimized 15+ complex SQL queries used in application workflows, data analysis, and reporting, reducing average query execution time by approximately 25%.
- Performed production data analysis by investigating application logs, database records, and transaction data to identify patterns and root causes of recurring issues.

- Conducted root-cause analysis that contributed to an approximately 25% reduction in production incidents over six months.
- Managed relational database operations involving SQL joins, aggregations, subqueries, constraints, foreign keys, and data validation.
- Performed data reconciliation and validation to identify inconsistencies and maintain data integrity across application and database systems.
- Collaborated with business analysts and technical teams to understand requirements and translate them into SQL queries, database solutions, reporting outputs, and analytical insights.
- Analyzed production and transactional datasets to identify anomalies, trends, and data-quality issues.
- Supported application and database troubleshooting by analyzing SQL results, production records, and system information.
- Worked with cross-functional teams to investigate data-related issues and deliver timely analytical and technical solutions.

PROJECTS

Business Performance & Operations Analytics

Domain: Business Analytics, Operations Analytics, KPI Reporting | Environment: SQL, Python, Pandas, Excel, Tableau

- Developed SQL queries using Joins, Aggregations, CTEs, Subqueries, and Filtering for data extraction and business reporting.
- Performed data cleaning, transformation, validation, and Exploratory Data Analysis (EDA) using SQL and Python.
- Used Pandas and NumPy to analyze datasets and identify trends, patterns, anomalies, and performance gaps.
- Built interactive Tableau dashboards with KPIs, filters, calculated fields, and business performance visualizations.
- Created Excel-based analytical reports using Pivot Tables and data summaries.
- Conducted root-cause and trend analysis to identify operational performance issues.
- Presented actionable insights to support business performance monitoring and decision-making.

Customer & Transaction Analytics

Domain: Customer Analytics, Transaction Analytics, RFM Segmentation | Environment: SQL, Python, Pandas, Excel, Tableau

- Extracted and analyzed customer and transaction data using SQL Joins, Aggregations, Subqueries, CTEs, and Filtering.
- Performed data preprocessing, cleaning, validation, and EDA using Python and Pandas.
- Conducted customer behavior analysis to identify purchasing patterns, customer trends, and high-value customer segments.
- Applied RFM (Recency, Frequency, Monetary) segmentation to categorize customers based on purchasing behavior.
- Performed statistical and comparative analysis to identify meaningful customer patterns.
- Created Excel reports and interactive Tableau dashboards to visualize customer KPIs, transaction trends, and segmentation results.
- Generated actionable insights to support customer retention, engagement, and business decision-making.

EDUCATION

Scaler Academy — Machine Learning & Data Science (In Progress, 2026)

Knowledge Divine IT Pvt. Ltd. (CDAC), Pune — Post Graduate Diploma in Advanced Computing (PG-DAC), 2022

Swami Vivekanand College of Engineering, Indore — Bachelor of Engineering (B.E., Civil Engineering), 2020

CERTIFICATIONS

Supervised Learning — Scaler Academy
