PROFESSIONAL SUMMARY

Software developer with 2 years and 11 months of experience working with Oracle SQL, relational databases, production data and business requirements, now transitioning into data analytics. Hands-on with SQL, Python, Excel and Tableau through structured training and analytics projects. Brings a strong foundation in data validation, root-cause analysis, query optimization and collaboration with business teams.

TECHNICAL SKILLS

Data Analysis : SQL (Oracle, MySQL), Excel (Pivot Tables, VLOOKUP, Power Query), Python (Pandas, NumPy), Tableau
Analytics : Statistics, Hypothesis Testing, Product Analytics, RFM Segmentation, Data Modeling, LOD Expressions
Visualization & Development : Matplotlib, Seaborn, Java, Spring Boot

PROFESSIONAL EXPERIENCE

Software Developer (Analyst)| Ebix Technologies Pvt. Ltd. (EbixCash), Pune Dec 2022 – Nov 2025

- Engineered and optimized 15+ complex SQL queries used in application workflows and operational reporting, reducing average execution time by 25%.
- Conducted root-cause analysis on production logs and database records, identifying recurring failure patterns that led to a 25% reduction in production incidents over 6 months.
- Worked extensively with relational database schemas across business modules, writing complex SQL queries and applying constraints and foreign key relationships to maintain data integrity; cleaned and validated datasets to support accurate reporting and analysis.
- Worked with business analysts to convert stakeholder requirements into backend logic, SQL queries and database changes.
- L Mapped end-to-end data flows and system dependencies for a legacy J2EE-to-Spring Boot migration proof of concept; the findings were used in the migration roadmap.

PROJECTS

E-Commerce Sales Performance Dashboard *Tableau*
View on Tableau Public

- Built an interactive dashboard to analyse sales, profit, product-category and regional performance using filters, calculated fields and LOD expressions.
- Identified seasonal patterns and three product categories contributing about 40% of total revenue, then summarized implications for inventory and discount decisions.

RFM Customer Segmentation Analysis *Excel*
(Pivot Tables, Custom Scoring)

- Performed RFM (Recency, Frequency, Monetary) segmentation on 10,000+ customer records, classifying users into Champions, At-Risk, and Churned cohorts using pivot tables and custom scoring models.
- Identified that the top 20% of customers generated the majority of revenue; designed a segment-specific retention playbook with targeted action plans for each customer tier.

EDUCATION

Scaler Academy — Machine Learning & Data Science *In Progress – 2026*
Knowledge Divine IT Pvt. Ltd. (CDAC), Pune — Post Graduation Diploma in Advanced Computing (PG-DAC) *2022*
B.E. in Civil Engineering — Swami Vivekanand College of Engineering, Indore *2020*
